

In 2001, Mass Audubon joined with four other statewide environmental groups to form the Forests and Parks Partnership to advocate for the care, management and stewardship of one of Massachusetts' most important resources: our state forests and parks system.

Our Goals:

- Increase public awareness about the declining conditions in our forests and parks;
- Build a strong, organized constituency for Massachusetts forests and parks;
- Assist government agencies in developing a vibrant and sustainable vision for the future of our forests and parks; and
- Ensure that the Massachusetts government fulfills its role as stewards of our forests and parks.

If you are interested in joining our effort to support Massachusetts forests and parks, or want to learn more, please contact the Forests and Parks Partnership.
