Senate co-sponsor: Patricia D. Jehlen

The Department of Conservation and Recreation (DCR) estimates that approximately 90,000 Massachusetts households own all-terrain vehicles or off-highway motorcycles, two popular types of off-highway vehicles (OHVs). OHV use is legal across a variety of land areas throughout the state, including eight DCR properties. However, hundreds of miles of illegal trails and riding sites on public and private lands are used by riders in Massachusetts, a practice that can be unsafe for riders and devastating for surrounding ecosystems. Habitat damage, erosion, and wetland disruption are all among the impacts illegal OHV activity can have on the local environment.

DCR convened an [Off-Highway Vehicle Enforcement and Education Working Group](#) to make recommendations for needed changes in OHV statute and regulation of which Mass Audubon was a member.

Key recommendations by the Working Group are as follows:

- Expand law enforcement capacity to provide consistent and effective enforcement of OHV laws and regulations.
- Strengthen fines and penalties for OHV offenses including trespassing.
- Require safety and responsibility training for all OHV operators eighteen (18) years of age and younger.
- Simplify the registration process and require registration for all OHV's with revenues directed to increasing enforcement capabilities and the development, maintenance and restoration of OHV trails.
- Strengthen communication among riders, land managers, enforcement agencies and other stakeholders by establishing an OHV Advisory Group similar to those in other states.

An Act Relative to the Regulation of Snow and Recreation Vehicles (HB3330) includes the DCR recommendations and tightens OHV regulations and increases certain fines and penalties. It also requires that a state off-highway vehicle advisory committee be established within the Executive Office of Energy and Environmental Affairs. The committee will advise state environmental agencies on matters involving the commonwealth's regulation of off-highway vehicles, including the development of places to ride.

Under the bill there would be established an "Off Highway Vehicle Program Fund" made up of fines, costs, and expenses paid to the state for off-highway vehicle activity. These funds would be used for enforcement of OHV regulations, acquisition and/or repair of OHV trails and facilities, and development of safety and training programs.
