2020
WELLFLEET BAY NATURE DAY CAMP
Welcome to Wellfleet Bay Nature Day Camp!

Wellfleet Bay Nature Day Camp inspires a child's lasting curiosity and excitement about nature. Campers ages 4 to 13 have fun and make friends as they explore the nature of Cape Cod at our 1,100-acre wildlife sanctuary. Our goals are to instill awareness and appreciation of nature, to demonstrate responsibility for the environment, and to promote a sense of place. Above all, we create a fun and memorable outdoor experiences for our campers.

FOR MORE INFORMATION:
Call 508-349-2615
Email mpeck@massaudubon.org
Visit massaudubon.org/wellfleetbaycamp

OUR CAMP STAFF
Our staff members are chosen for their enthusiasm, experience, knowledge, and ability to work with children in the outdoors. They are college graduates or undergraduates currently enrolled in an environmental and/or educational field of study. All are certified in first aid and CPR and participate in a pre-camp training in safety, child development, and natural history.

OUR CAMP DIRECTOR
Morgan Peck has been an educator with Mass Audubon for eight years, spending the past five at Wellfleet Bay Wildlife Sanctuary. Throughout the year, Morgan teaches and coordinates educational programming for local and visiting schools to Wellfleet Bay. Her specialty is marine organisms, and when not teaching, Morgan helps with local stranded/entangled sea turtles, and other marine mammals.

TOO YOUNG FOR CAMP?
Visit massaudubon.org/wellfleetbay for a listing of guided programs for families with young children.

YOU’RE NEVER TOO OLD FOR CAMP!
See page 8 for opportunities for high school students.

CAMP FAMILY HIKES
Check out some of the cool places that your camper has been talking about—from the coyote den to the “painted turtle bridge”—on Wednesday mornings from 8:00 to 8:45 am each camp day. Preregistration is not required and the hike is free.

“Loved everything—her counselors, being outdoors, learning lots of interesting things!”
HANDS ON HABITATS
June 22–26
Cape Cod has some pretty happenin’ habitats! From forests to salt marshes to barrier beaches, there sure are a lot of unique areas to explore at Wellfleet Bay. We will spend each day learning about and visiting a different habitat, and seeing the animals that call it home!

COLD-BLOODED CRITTERS
June 29–July 3
Feel a Painted Turtle’s shell, catch slimy frogs and toads, and observe Garter Snakes basking in the sunny grass! What makes them different from us, and how do they survive in their habitats here on Cape Cod? As cold-blooded critters, their bodies can do some pretty amazing things when the temperatures drop. Find out what as you roam and search for reptiles and amphibians.

COASTAL ENCOUNTERS
July 6–10
Cape Cod is the perfect place to encounter coastal life. Spend the week observing shorebirds on beaches, digging for clams and worms on tidal flats, mucking about for crabs in salt marshes, following coyote track in the dunes, and keeping an eye out for hawks and snakes in the heathland.

FASCINATING FLYERS
July 13–17
Ever wonder why birds have differently shaped beaks? How butterflies travel so far on their gentle wings? Why bats only come out at night? This week learn all about our wonderful winged critters and how their specialized bodies are built to survive. Follow birds and insects in nature and learn their movements by playing and acting out fun games!

WILDLIFE MUSICIANS
July 20–24
Cup your hand to your ear... What kind of noises can you hear all around us? There is a symphony in nature; discover it by listening for birds calling, frogs croaking, bees buzzing, and crickets chirping. Sing our own songs, and become a part of nature’s beautiful orchestra.

NATURE ART
July 27–31
Gather inspiration from the natural world, and spend lots of time outside building art. From fairy houses to leaf murals to shell collages, bring a different habitat or animal to life and have a natural piece of homemade art to take home!

DISCOVERERS
Entering Pre-K or Kindergarten*
Counselor-to-Camper Ratio: 1 to 5

The Discoverers program is designed to encourage a young child’s curiosity, increase sensory awareness, and provide an introduction to nature exploration. Sessions are half day, with time for a mid-morning snack, or full day with time for snack and lunch.

HALF DAY
9:00 am–12:30 pm
June 22–July 24
$240 members
$305 nonmembers per week
July 27–August 28
$260 members
$325 nonmembers per week

FULL DAY
9:00 am–2:30 pm
June 22–July 24
$300 members
$365 nonmembers per week
July 27–August 28
$335 members
$400 nonmembers per week

*Discoverers must be age 4 by June 1.

ADVENTURERS
Entering Grade 1
Counselor-to-Camper Ratio: 1 to 5

The Adventurers program provides continued field experience to increase a child’s comfort in nature. Using exploration, crafts, and creative games, we focus on animals and their habitats. Sessions are half day, with time for a mid-morning snack, or full day with time for snack and lunch.

HALF DAY
9:00 am–12:30 pm
June 22–July 24
$245 members
$310 nonmembers per week
July 27–August 28
$255 members
$330 nonmembers per week

FULL DAY
9:00 am–2:30 pm
June 22–July 24
$310 members
$375 nonmembers per week
July 27–August 28
$335 member
$400 nonmembers per week

The Discoverers program is designed to encourage a young child’s curiosity, increase sensory awareness, and provide an introduction to nature exploration. Sessions are half day, with time for a mid-morning snack, or full day with time for snack and lunch.

COASTAL ENCOUNTERS
July 6–10
Cape Cod is the perfect place to encounter coastal life. Spend the week observing shorebirds on beaches, digging for clams and worms on tidal flats, mucking about for crabs in salt marshes, following coyote track in the dunes, and keeping an eye out for hawks and snakes in the heathland.

FASCINATING FLYERS
July 13–17
Ever wonder why birds have differently shaped beaks? How butterflies travel so far on their gentle wings? Why bats only come out at night? This week learn all about our wonderful winged critters and how their specialized bodies are built to survive. Follow birds and insects in nature and learn their movements by playing and acting out fun games!

WILDLIFE MUSICIANS
July 20–24
Cup your hand to your ear... What kind of noises can you hear all around us? There is a symphony in nature; discover it by listening for birds calling, frogs croaking, bees buzzing, and crickets chirping. Sing our own songs, and become a part of nature’s beautiful orchestra.

NATURE ART
July 27–31
Gather inspiration from the natural world, and spend lots of time outside building art. From fairy houses to leaf murals to shell collages, bring a different habitat or animal to life and have a natural piece of homemade art to take home!
**DISCOVERERS & ADVENTURERS cont.**

**ANIMAL ACTORS**
August 3–7
If you watch closely, you will see that animals have amazing individual personalities! Keep an eye out for funny critters, and use them to inspire us in creating our own nature-themed puppet show. We’ll use our imaginations to turn ourselves into the fun animals we see with the help of costumes and homemade masks, and then play animal charades!

**UNDER YOUR FEET**
August 10–14
Get low, go slow, and search for what lies at your feet. Look in nearby bushes and under piles of fallen leaves to uncover creepy crawlers. Learn to observe the ground from an animal’s perspective, and find out just how important soil is. You won’t have to go far to discover what’s been hiding right under your nose, like worms, a robin’s nest, or even a Garter Snake!

**BETWEEN THE TREES**
August 17–21
Travel through some of Cape Cod’s wooded habitats and learn about the animals that make their homes in fields and trees. What do Grey Squirrels do in oak trees? Why do chickadees hide inside tree trunks? Become familiar with all sorts of furry and feathered forest creatures!

**FINS AND FLIPPERS**
August 24–28
What would it be like to swim with a seal’s sleek body or paddle with a sea turtle’s strong flippers? Search for minnows, tadpoles, and more as we seek out aquatic habitats like the pond and marsh. We’ll discover and act out how various animals move through water.

---

**EXPLORERS**

**Entering Grades 2–3**
Counselor-to-Camper Ratio: 1 to 8

The Explorers program emphasizes the natural history of animals and the interrelationships of all living things through observation and hands-on field activities.

**METAMORPHOSIS MAGIC**
June 22–26
Are you fascinated by certain creatures amazing ability to transform? To be born in a completely different form than the one they grow into is a kind of magic all its own! This week, watch the metamorphosis of some amazing animals. Witness Painted Ladies go from caterpillars to beautiful winged butterflies, catch and examine dragonfly nymphs (the larval stage of impressive dragonflies), and visit the pond in search of bullfrog and Green Frog tadpoles!
FURRY FUN TIME
June 29–July 3
Campers will venture to our habitats this week including the forest, field, pond, and salt marsh discovering different mammals that live on Cape Cod! We'll focus on their special adaptations, and their differences between other animals. Feel raccoon furs, follow coyote tracks, and wear homemade whale blubber!

SENSES OF NATURE
July 6–10
Look, listen, smell, and touch as we roam the outdoors using all of our senses. Discover local creatures that have special sensory abilities, including a horseshoe crab’s eyes, a butterfly’s feet, a deer’s ears, and a sea turtle’s nose. Get even closer to nature this week by using more than just your eyes in the field!

SWAMP ROMP
July 13–17
What is life like for insects, amphibians, and reptiles that live in a muddy, squishy swamp? Get dirty building mud huts, rolling logs, and learning how to handle critters from the swamp like salamanders, Wood Frogs, and slugs.

SEASIDE ADVENTURE
July 20–24
When the tide goes out, discover all the critters it leaves behind. Watch Fiddler Crabs race about, feel snails crawl on your hand, and listen to gulls squawk on the beach while they hunt for prey. This week’s focus is on all the organisms that make our tidal flats and barrier beaches special, and their adaptations to survive the changing tides.

JUNIOR GEOLOGISTS
July 27–31
Years ago Cape Cod was covered by the sea, and years from now it will be covered again. Find clues of our underwater past leftover from the Ice Age, and try to solve the mysteries of tomorrow. Using magnifiers and strainers, examine different kinds of sand and learn how it got all the way to our beaches.

BIRD OLYMPICS
August 3–7
Have you ever wondered why there are so many different kinds of birds? They are the elites of the adaptation world! Determine which are the master builders, long distance fliers, and top-level predators. Match your wingspan to a bird’s and act out different species in a relay race migration game.

BOLD AND BRIGHT
August 10–14
Search for the brightest flower, the most vibrant bird, and the animals with the most unique patterns and markings, as you discover the importance of color in nature. Draw, paint, or sculpt the beautiful vivid nature you see. From providing camouflage to indicating whether an animal may be poisonous, color has many useful traits for wildlife!

BUG BAZAAR
August 17–21
Insects are all around us, and a crucial part of our food webs. Get comfy with bugs of all kinds, and learn why there are such good friends to us through fun games, crafts, and an insect zoo! From earthworms and crickets to bees and butterflies, no bug is too big or too small to examine.

RAD REPTILES
August 24–28
What makes reptiles and amphibians unique from their furry counterparts? Find out by investigating a snake’s shed skin and various turtle shells, and discover where reptiles lay their eggs. Travel to nearby ponds or vernal pools to look for salamanders and catch tadpoles, frogs, and turtles. Get wet and muddy searching for our slimy, scaly friends!
The Naturalists program allows those interested in science to participate in field activities while learning methods and techniques used in wildlife conservation biology. This program also includes weekly field trips to areas relevant to the subject being studied, as well as fun nature-based games and crafts! Sessions are full day with time for snack and lunch.

9:00 am–2:30 pm
June 22–July 24
$395 members
$460 nonmembers
per week

July 27–August 28
$425 member
$490 nonmembers
per week

**LIVING WITH WILDLIFE**

June 22–26
Humans and wildlife have been living side by side since the beginning of our species, yet wild spaces are declining. Delve into the various ways that we can protect our wildlife neighbors, and how you can be a true nature hero! Help build enclosures for nesting turtles, look for tagged horseshoe crab, and explore important shorebird habitats. **Field Trip: A turtle nesting site**

**CAPE COD COASTS**

June 29–July 3
Wind, salt spray, sandy soils, and coastal development make it challenging to live on Cape Cod. Learn what adaptations different plants and animals have to survive these harsh conditions by observing them in their natural environment. Take out your field guide and nature journal to document what adaptations you witness first hand! **Field Trip: Truro Dunes**

**FASCINATING FOOD WEBS**

July 6–10
Organisms big and small are all connected by a web of life. Find out how our ecosystems and beloved creatures (as well as some not so loved) interact and rely on one another. Use a seine net down at the tidal flats and tow for plankton to observe some of the most important species in the ocean. Use microscopes to identify some of the smallest critters and visit all sorts of fun places to discover the ties that connect our coastal habitats together. **Field Trip: Shellfishing to Chatham Upweller**

**BOTTOM UP BIOLOGISTS**

July 13–17
The best way to learn about any ecosystem is from the bottom up. Explore Cape Cod's natural habitats like the salt marsh, the forest floor, open fields, and freshwater...
ponds by examining the living (and
dead!) hidden in the bottom layers
of these areas. Grab a magnifying
glass, and search for invertebrates
under dead logs and leaf litter to find
out how things that were once alive
fuel the grand cycle of life. Field Trip:
White Cedar Swamp at the Cape Cod
National Seashore in Eastham

WINGED WONDERS
July 20–24
Find out why Cape Cod attracts
such incredible—and sometimes
rare—species of birds. Discuss their
specialized adaptations, the habitats
they use, nesting techniques, and
feeding habits. Become familiar with
common birds, and get a chance to
observe the less common migrants.
Play games and create your best
imagined bird to compare with
other campers. Field Trip: Chatham
and Harwich to survey nesting
shorebirds with a Mass Audubon
Coastal Waterbird expert

SPINELESS WONDERS
August 3–August 7
Over 80% of the animal world is made
up of animals without backbones—
insects, worms, jellyfish, squid, crabs,
clams, and so much more! Catch
different species of crabs, dissect a
squid, dig for clams, and hold sea stars
all while exploring the beach for these
spineless wonders! Find out why having
no backbone benefits these creatures
and enables them to survive. Field Trip:
Nickerson State Park in Brewster

HABITAT HUNTERS
July 27–31
Get to know the powerful hunters
that call our nearby habitats home
including what makes them such
successful predators. Visit the forest
and dissect a pellet from a Great
Horned Owl, roam the beach to witness
the techniques of the cunning fox, and
see a snapping turtle’s powerful neck
and jaw in action. Play “predator-prey”
with your friends to see just how well
you’d survive if you were the prey. Field
Trip: Tag horseshoe crabs on a tidal
flats beach

WRACKLINE
INVESTIGATORS
August 10–14
 Traverse our nearby coastlines to
discover the mysteries that every
wrack-line holds. A collection of things
the ocean has uncovered, the wrack is
anything that has washed up above the
high-tide line; it’s filled with all sorts of
marine treasures. Look closely for small
living invertebrates like sand hoppers,
crab, and mollusks! Field Trip: Cape
Cod National Seashore in Eastham

OCEAN ODYSSEY
August 17–21
Gain a new understanding of Cape
Cod’s marine communities including
the outer Atlantic, bay, marsh, and
tidal beaches. Take to the open ocean
to look for Mola Mola (the largest bony
fish!) and White-sided Dolphins, and
explore the marine communities’
that thrive on the benthic (bottom)
zones of our shallow bay waters. Use
seine nets and set fish traps to get an
up-close look at some of our amazing
oceanic creatures. Field Trip: Marine
Life Cruise

HERP SEARCH
August 24–28
Herpetology is the study of reptiles
and amphibians! Become an expert
this week in turtles, snakes, frogs,
and salamanders. Assist researchers
by tracking Eastern box turtles,
monitoring Red-Backed Salamanders,
and looking for Black Racers or Ring-
neced Snakes. Play “Lizard Tails”
with your friends, pretending your tail
can grow back if stolen by a predator!
Field Trip: Tag diamondback
terrapins

There’s more to explore!

Mass Audubon’s overnight camp in New Hampshire

• Overnight Camp, ages 8–14
• Wildwood Warblers, ages 7–8
• Teen Adventure Trips, grades 9–12
• Environmental Leadership Program, grades 10–11
• Counselors-in-Training, grade 12
• Family Camp, all ages!

Visit massaudubon.org/wildwood or call
866-627-2267 to learn more and register.
The Ecologists program expands past the basic natural history knowledge. Campers will explore both on and off the sanctuary and participate in inquiry-based activities, scientific research, and ecological management studies. All sessions include opportunities to learn practical field techniques and practices for working with wildlife, as well as outdoor skills such as kayaking or snorkeling.

9:00 am–2:30 pm  
June 22–July 24  
July 27–August 28  
$425 members  
$465 member  
$490 nonmembers per week  
$530 nonmembers per week  
See specialized pricing for Shark Enthusiasts & Through the Streams sessions.

**FASCINATING FIELDS & FORESTS • June 22–26**

It’s not all about the water here on Cape Cod—the drier habitats, like our fields and forests, are important parts of a larger, more diverse ecosystem. Grab your backpack and explore the beautiful pitch pine forests, maritime heathlands, and grasslands to learn all about our fun terrestrial critters—box turtles, turkeys, coyotes, and more! Field Trips: Nickerson State Park in Brewster and Harwich Conservation Trust

**THE POWER OF THE COASTLINE • June 29–July 3**

The shape of Cape Cod and its coastline are constantly changing. Learn about many of the coastal processes that affect our beaches and contribute to their ever-changing nature and resilience. Hear from people whose careers are dedicated to studying coastal habitats and wildlife, and find out what you can do to protect the beautiful marshes, beaches, and animals that live there. Field Trips: Seal Cruise and Monomoy National Wildlife Refuge

**SHARK ENTHUSIASTS* • July 6–10**

$475 members; $540 nonmembers

Immerse yourself in shark biology and marine science through hands-on labs and field trips to several local destinations. Engineer hydraulic arms to complete sampling challenges, learn about the various tags used in tracking sharks, study the anatomy of a shark by completing a shark dissection, and observe the Great White Shark’s primary food source—seals! Offered in partnership with the Atlantic White Shark Conservancy. Field Trip: Cruise to check an Active Shark Receiver, and trip to the Chatham Fish Pier

**GEOCACHING, A REAL LIFE TREASURE HUNT! • July 13–17**

Have you ever dreamed of finding a map that would lead you on your very own treasure hunt? Geocaching consists of using a GPS unit to follow a map of clues that leads you to a trove of hidden items (the "cache") somewhere in nature. These maps are created for those who want to get out and explore beautiful natural spaces. Search for geocaches and learn orienteering and wilderness survival skills along the way! Field Trips: Eddy Sisters Trail in Brewster and Orleans Conservation Trust

**NATURE PHOTOGRAPHY • July 20–24**

Set your focus on photographing turtles, frogs, crabs, and other Cape Cod wildlife. Bring your phone or camera (or borrow ours) to get a lesson on how to
compose and capture images and then photograph wildlife both on and off the sanctuary, and visit a beautiful functioning cranberry bog for inspiration. You’ll have the opportunity to take pictures aplenty and identify and document as many plants and animals as possible during this bio-blitz. **Field Trip: Cold Brook in Harwich**

**MISSION: DECOMPOSITION** • July 27–July 31
Why does the salt marsh smell so weird? What’s in the muck at the bottom of the pond? Decomposition, or simply broken down dead stuff, is an extremely important part of any healthy habitat. Examine the lesser-known parts of the marsh, pond, and forest to get the science behind why we need the decomposers in our ecosystem! From mushrooms and insects to snails and salamanders, follow small creatures who will show you what was once alive! **Field Trips: White Cedar Swamp in National Seashore and kayaking in Nauset Marsh**

**THE GAME OF CLUE: NATURE EDITION** • August 3–7
Nature mysteries are all around us. Who dug up those turtle eggs? Why are all these feathers on the ground? How did that tree fall down? Step outside to locate something puzzling, collect nearby clues for a potential hypothesis, and submit your case to the rest of your group for review. Step into the mind of a true nature detective to make sense of evidence that’s right under your nose. **Field Trips: Stand-up Paddle Boarding in Orleans and a cruise to Tern Island in Chatham**

**MARINE MANIA** • August 10–14
See all the wonders the open ocean have to offer! Jellyfish, sea turtles, pelagic birds, and countless others make their home in the vast blue waters. Discover the differences between bayside and oceanside beaches as you comb the shores and see seal populations on a guided boat tour! **Field Trips: Whale watching cruise in Provincetown and a hike to Great Island in Wellfleet**

**THROUGH THE STREAMS**• August 17–21
$475 members; $540 nonmembers
Explore the freshwater habitats of various aquatic life, from stream to sea! Set eel traps and reveal the contents, discuss the lifecycle of herring, and see unique changes that these running freshwater bodies of water undergo as they empty into an estuary. Collect water specimens to observe their behaviors and adaptations. Offered in partnership with Association to Preserve Cape Cod. **Field Trips: Kayaking in Nauset Marsh and to the Brewster kettle ponds**

**POLLINATOR POWER!** • August 24–28
From birds to butterflies to bees, investigate the adaptations that make pollinators unique from other animals. Observe Painted Lady butterflies as they metamorphose from caterpillar to winged adult, build a hummingbird feeder for the Pollinator Garden, and learn what makes this group of animals so important to our world. **Field Trip: Brewster Cape Cod Natural History Museum and the Harwich Lavender Farm**

**ONE-WEEK OVERNIGHT:**
**COASTAL ECOLOGY EXPEDITION**
August 17-21

**Ages 14-17**
$850 members; $950 nonmembers

Wellfleet Bay introduces its first ever overnight camp session for teens! Join like-minded teens from Mass Audubon’s Drumlin Farm Wildlife Sanctuary for a week of investigating rare coastal ecology sites from Barnstable to Provincetown! Discover the area’s hidden gems while camping out with new friends, and view some incredible nature and wildlife with Mass Audubon scientists. For more information about the week’s itinerary, call our sanctuary’s main line.

---

**Leaders-in-Training (LIT)**

**Ages 14-17**
$210 members; $275 nonmembers per week

Wellfleet Bay’s Leaders-in-Training (LIT) Program gives teens the opportunity to gain leadership experience while working with counselors and campers. LITs might participate in diamondback terrapin research or assist with horseshoe crab tagging. They receive training related to natural history and how to teach nature-themed lessons, games, and activities. One evening program each week is reserved for a night hike or bonfire! LITs can participate in one or more weeks.
REGISTRATION INFORMATION

TO REGISTER FOR CAMP
Visit massaudubon.org/wellfleetbaycamp
Call 508-349-2615
Mail the attached registration form and payment to: Wellfleet Bay Wildlife Sanctuary, P.O. Box 236, South Wellfleet, MA 02663

REGISTRATION POLICY
Registration begins January. Mailed registrations will be stamped with the date of receipt and processed on a first-come, first-served basis.

REGISTRATION CONFIRMATION
A confirmation letter/email containing important documents and information will be sent once your camper’s registration has been processed.

PAYMENT PLANS
Payment plan options are available. Please contact the Camp Director for more information.

IMPORTANT DEADLINES
All camp forms, waivers, and the balance of your camp tuition are due by May 15. If registering after May 15, payment in full is required and a specific camp form deadline will be set for you. A camper cannot attend camp and his/her spot is not guaranteed until all forms, waivers, and payments are completed (or a payment plan has been established). A fee of $75 per camper will be charged for incomplete or late forms and waivers.

CAMPER REQUIREMENTS
Campers are expected to meaningfully participate in age-appropriate activities, including outdoor exploration and nature study. To ensure a successful camp experience, please discuss any pertinent information regarding your child’s special needs with the Camp Director. We can accommodate on a case-by-case basis in order to establish the best strategy for a great summer camp experience.

FINANCIAL AID
Financial assistance is available based on demonstrated economic need and available funds, and is generally limited to one session per child; however, all applications are considered. Applications are due by May 1. Please call the Camp Director to request an application or download one at massaudubon.org/campforms.

CAMP CONTACT INFO

Wellfleet Bay Wildlife Sanctuary welcomes more than 1,100 campers and 32,000 visitors annually. We protect and conduct research on a number of Cape Cod's endangered, threatened, and at-risk species. Our robust science program enables us to bring research into all of our education programs, including day camp. To support Wellfleet Bay’s education and conservation work, call 508-349-2615 x6109 or go to massaudubon.org/wellfleetbay.

Mass Audubon protects more than 38,000 acres of land throughout Massachusetts, saving birds and other wildlife, and making nature accessible to all. As Massachusetts’ largest nature conservation nonprofit, we welcome more than a half million visitors a year to our wildlife sanctuaries and nature centers. Today, Mass Audubon is a nationally recognized environmental education leader, offering thousands of camp, school, and adult programs. With more than 135,000 members and supporters, we advocate on Beacon Hill and beyond, and conduct conservation research to preserve the natural heritage of our beautiful state. We welcome you to explore a nearby sanctuary, find inspiration, and get involved. Learn how at massaudubon.org.
