

YOUNG EXPLORERS

Here's how to create your own six-sided paper snowflake:

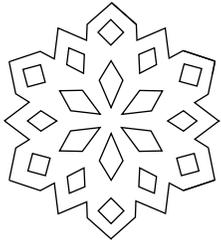

1. Cut off the top part of the page so you can read the instructions as you go.
2. Fold the hexagon in half along Fold 1. Keep the grey guides facing you.
3. Fold toward the back (away from you) along Fold 2, then do the same with Fold 3.
4. Fold the triangle in half along Fold 4 so that the guides are all you can see.
5. Cut away all of the gray parts. Carefully unfold to reveal your snowflake!

Experiment with your own designs. What amazing snowflakes can you create?
