

Virtual Fish Count

- 1. Go to the Tidmarsh fish count website
- 2. Use the <u>data sheet provided</u> then enter the data directly into <u>this form</u> (or enter directly)
- 3. Write down your start time. Your count ends in 10 minutes. You an use a timer to help.
- 4. During the 10 minutes, watch your screen carefully and count the number of fish you see on the live video feed
- 5. Note the water and air temperature in Celsius (hover over the video feed to see these)
- 6. Note the weather on datasheet
- 7. Fill in additional observations under comments including whether you recognize the fish as river herring and any other wildlife you see
- 8. If you used a paper data sheet now enter the data into <u>this form</u>.

Wait 10 minutes before starting another count
