

## Build a Magical House

Use your imagination and found natural materials to create a miniature world for forest fairies, gnomes, and mice to explore!

### WHAT YOU'LL NEED

- Any kind of green or outdoor space
- Your imagination

### INSTRUCTIONS

1. Pick any kind of green space—either at a park, at a wildlife sanctuary, or in your neighborhood.
2. Gather natural materials like colorful leaves, acorns, feathers, and sticks that you might want to use to create your mini house. Be sure to gather materials that have already fallen on the ground so you are helping to keep the plants healthy.
3. Find a place where you would like to build your magical house and start exploring by leaning sticks against each other to build walls, a kitchen, a slide, a garden—whatever you want!
4. When you are done playing, take everything apart to leave no trace.
