Our Coast Our Future: Climate Justice

Use this page to reflect on what you are learning about climate justice throughout this class. You can use words and/or pictures in your comments.

1. What was your reaction to the introductory activity? What was challenging about it? What did it make you think about / what additional questions do you have?
2. What struck you as new, surprising, or particularly interesting in the *Climate Justice in Boston* video?
3. As the class discussed barriers to climate justice which one or ones stood out to you as particularly important? Why?

4. You just considered some strategies for better involvement in decision-making and better access to resources for communities often left out of these areas. Which strategy do you think might be most helpful in your community? Why? If there's something else that you think would be important in your city or town but that wasn't on the list the class looked at, you can describe that instead.
