Check This Out:
Your group will love this collection of Mass Audubon online programs, covering an array of seasonal and year-round nature and birding topics. Learn about the world around you, how to manage the spaces you occupy in a sustainable way, or discover an exciting hobby you can practice together.

Conveniently offered online, you’ll get a thorough introduction to take with you on your next trip outside—at home, in your neighborhood, or at one of our wildlife sanctuaries throughout Massachusetts.

Programs are 1 hour in length, with 45 minutes of content and a chance for Q&A. Conveniently hosted via your organization’s video presentation platform.

Seasonal Offerings for Spring

The Nature of Spring
Springtime in Massachusetts is filled with unique seasonal wonders and mysteries. What animals are making noises in the evenings and why? Who is migrating back or waking from their winter slumbers? What kind of wildflowers are popping up near the sidewalks and woodland trails?

This online program will introduce the seasonal dynamics of nature in spring, and provide ideas and resources for observing, appreciating, and supporting wildlife near home during this season.

Birding by Ear
If you’ve ever been confused by birdsong outside your window or in the field, don’t miss this chance to learn how, why, and most importantly, which birds are singing.

You’ll learn about vocalizations, differences between songs and calls, and how to decipher what you hear now and in the coming months. Come away with a basic skill set for listening to the cacophony of spring, and tools for identifying new and unusual songs.

Brief discussion sessions will be offered for those wishing to practice. Combine this class with local bird walks to deepen your birding experience.

Introduction to Birds & Birdwatching
What are those intriguing birds in your neighborhood, along the roadways, and outside your windows—and what are they doing? Find out what makes birds unique within the animal kingdom, where and how to locate birds in different settings, and basic bird biology and behavior.

You’ll learn birdwatching basics from the experts, including various tools and resources for identifying and how to support local and global bird populations.

Birdwatching is one of the fastest growing life-long, recreational activities in North America—here’s your chance to jump on the bandwagon and start this rewarding hobby.

Living with Wildlife in Massachusetts
We share Massachusetts with a diverse range of wildlife that you may have come across exploring your neighborhood or making headlines in the news.

Learn about commonly encountered wildlife such as deer, coyote, and raccoons, and their intersection with the wild and developed spaces we inhabit. Find out best practices for maintaining bird feeders and attracting visitors. From amazing pollinators to problematic mosquitoes and ticks, we’ll introduce some incredible insects and how we impact each other.

Whether you watch it from your window or your screens, you’ll learn more about how to peacefully co-exist with these unique neighbors here in the Commonwealth.

Available Year-round

Landscaping & Gardening for Wildlife
Do you have a true green thumb? Meaning, are you taking into account the complete ecosystem around the land you care for?

Learn how you can support local species by utilizing wildlife-friendly gardening practices in your home, business, and community settings.

Simple, easy actions like keeping fall leaves on the ground could have huge effects, and bring in more butterflies, come spring!

Learn about what to do, and not do, in your yard, garden, or even container, to support nearby birds, frogs, pollinators, and more in a sustainable fashion.
