massaudubon.org/schools
Mass Audubon School Programs

Through field studies and classroom explorations, Mass Audubon provides hands-on, inquiry based experiences with science content and practices. Our educators enhance students’ scientific understanding of species and habitats; ecological concepts such as food webs, cycles, systems, adaptation, and evolution; climate change; and interrelationships between people and nature.

About Mass Audubon Metro West

The wildlife sanctuaries of Mass Audubon Metro West support science learning and the Massachusetts curriculum frameworks through hands-on and student-centered programs. A diverse array of habitats, landscapes, and agricultural operations offer ample opportunities to connect with nature and explore the relationship between people, wildlife, and the land.

Sanctuaries frequently visited by school groups include:

Drumlin Farm, Lincoln
Broadmoor, Natick
Habitat, Belmont

We Meet You Where You Are

Programs at your school, at our wildlife sanctuaries, or wherever nature is most accessible for you

Whether you want to bring nature into the classroom or take lessons outside, our programs offer insight into New England habitats and native species and enrich natural history and science lessons while strengthening students’ connections to the environment.

Accessible Programs

Mass Audubon is committed to providing engaging, exciting, meaningful, and enduring educational programs, field trips, and learning activities for students with a broad range of physical, sensory, and learning needs.

Our educators strive to design and deliver adaptive programs that align to educational best practices and meet the needs of all students. The award-winning, ADA-compliant, interpretive All Persons Trails at many of our wildlife sanctuaries are open for all visiting school groups, providing access to wetland boardwalks, wildlife viewing areas, and gardens for birds, butterflies, and more.

We will gladly work with you to meet the needs of your classroom. For more information, please contact your local sanctuary.

CONTACT INFORMATION
metrowesteducation@massaudubon.org

massaudubon.org/metrowest
Drumlin Farm Wildlife Sanctuary, Lincoln

At Drumlin Farm, you can experience life on a working farm and explore a wildlife sanctuary at the same time! This unique setting provides opportunities to delve into the interdependence of people, land, and wildlife. Visit pigs, sheep, goats, chickens, and cows in the farmyard; learn how crops are sustainably grown on-site; walk the trails to explore field, forest, and wetland habitat; and observe resident owls, hawks, and a fox in native wildlife exhibits.

Broadmoor Wildlife Sanctuary, Natick

An expansive retreat along Indian Brook and the Charles River, Broadmoor is an ever-changing environment teeming with wildlife: dragonflies darting, turtles basking, otters leaving tracks in the mud or snow, and more than 150 species of birds. Easy-to-moderate well-groomed trails lead you through the shade of mature woodlands into open fields and along the edges of streams, ponds, and marshland. Broadmoor’s diverse landscape inspires exploration into the ecological value of aquatic ecosystems and the geologic processes that shaped the land.

Habitat Education Center & Wildlife Sanctuary, Belmont

Gentle trails wind through deciduous and evergreen forests, across meadows, and around ponds and vernal pools at Habitat, located just seven miles from downtown Boston. A long-standing center for environmental education, Habitat is an integral parcel of the Western Greenway, which connects 1,200 acres of open space in Waltham, Lexington, and Belmont, inviting people to reconnect with nature within this oasis of green. Examples of sustainability—including goats that help control invasive plants and a community garden with plots for rent—make this a great spot to learn about green practices while you explore.
Early Childhood & Elementary

Our Early Childhood and Elementary programs combine standards-aligned science content with the joy and excitement of learning about nature. We can bring the natural world to you through programs in your classroom, connect students to the ecology of their own schoolyard, or facilitate scientific exploration on a field trip at one of our wildlife sanctuaries.

Mass Audubon’s Signature Program

Science of Massachusetts
A Mass Audubon Education Program

Science of Massachusetts is a multi-week curriculum for grades K–8 that will engage your students in exciting, hands-on, nature-based science right in their own schoolyard.

See page 6 for more details.

Additional Programs

Wild Tales
Pre-K–K | fall, winter, or spring
Single Program | 30 minutes, 45 minutes, or 1 hour

Listen to a favorite children’s book and meet a wild character from the story! Learn about where the animal lives, what they eat, and their unique adaptations that help them to interact with their environment.

Locations: At your school

Habitats & Homes
Grades Pre-K–K | fall, winter, or spring
Single program or series | One school visit (30 minutes, 45 minutes, or 1 hour) and/or one field trip (2 hours)

Choose either a single school-based program or field trip, or combine the two into a series.

Explore a natural area in your community or schoolyard as you look for tracks and other signs of native wildlife. Search for food, water, shelter, and space that supports the basic needs of the plants and animals that live here.

Location: At your school and/or any Metro West wildlife sanctuary
**Nature Detectives**  
Pre-K–K  | fall, winter, or spring  
*Single or Series Program | 30 minutes, 45 minutes, or 1 hour*  
Explore the mysteries of nature through the seasons, from the comfort of your classroom and/or schoolyard habitat. Students will use their senses, compare and contrast, and learn through movement activities and observations. This program can include a live animal.  
Locations: At your school or a community greenspace

**Life on the Farm**  
Pre-K–Grade 1  | spring  
*Single Field Trip | 2 hours*  
Field Trip: Explore fields, gardens, barns, and trails at your own pace as you experience life on a farm. Visit various hands-on, farm- and nature-based learning stations where you'll engage in daily farm activities and learn about the animals that live in New England. Program runs on specific dates.  
Locations: Drumlin Farm Wildlife Sanctuary

**Introducing Adaptations**  
Grades K–2  | fall, winter, or spring  
*Single program | 45 minutes or 1 hour*  
Observe biological artifacts for similarities and differences in body parts, structures, behaviors, and functions as you investigate what it means for plants and animals to be adapted to their home. This session is a great pre-visit to combine with the Life in the Water or Habitat Explorations field trips.  
Locations: Your classroom or schoolyard

**Life in the Water**  
Grades K–2  | fall or spring  
*Single program or series | One school visit (30 minutes, 45 minutes, or 1 hour) and/or one field trip (2 hours)*  
Choose either a single school-based program or field trip, or combine the two into a series.  
In the classroom, use scientific tools to investigate samples of aquatic life. Add a live wildlife visit to look at adaptations to habitat, explore an aquatic food web, or see life cycle stages.  
In the field, use dip nets and other tools as you explore the unique life cycles of the organisms that live in the water and depend on wetland and upland habitats to survive.  
Locations: Your school and/or any Metro West wildlife sanctuary

**Introducing Adaptations**  
Grades K–2  | fall, winter, or spring  
*Single Program | 30 minutes, 45 minutes, or 1 hour*  
In the classroom, meet live wildlife to support learning about specific adaptation connections, such as coping with seasonal changes, life cycles, and stages of development. Or, take an in-depth exploration into the physical and behavioral adaptations of a particular group of animals.  
Locations: Your school

**Habitat Explorations**  
Grades 1–3  | fall, winter, or spring  
*Single program or series | One school visit (30 minutes, 45 minutes, or 1 hour) and/or one field trip (2 hours)*  
Choose either a single school-based program or field trip, or combine the two into a series.  
Discover the amazing habitats, plants and wildlife found around your school or in your community. Search for the sources of food, water, shelter, and space that plants and animals need in order to successfully live there.  
On a visit to a wildlife sanctuary, investigate field, forest, and wetland habitats to search for the sources of food, water, shelter, and space that plants and animals need in order to successfully live there. Observe similarities and differences in body parts, structures, behaviors, and functions as you learn what it means for wildlife to be adapted to their home.  
Locations: Your school and/or any Metro West wildlife sanctuary

**Additional Programs**

**Early Childhood & Elementary Programs**

**Animal Ambassadors**  
Our native, non-releasable animals give students the opportunity to experience up-close the rich variety of life found in Massachusetts.  
The owl icon indicates a program that can include live animals.
Soil Investigations
Grades 1–3  | fall, winter, or spring
Single program or series  | One school visit (30 minutes, 45 minutes, or 1 hour) and/or one field trip (2 hours)

Choose either a single school-based program or field trip, or combine the two into a series.

What is soil made of? Compare different soil samples and investigate their properties using scientific tools. We can bring soil samples to you or we can explore soil near your school.

In the field, learn about how healthy soil supports healthy food and a healthy planet at Drumlin Farm or learn how soil holds secrets to the past at Broadmoor and Habitat.

Locations: Your school and/or any Metro West wildlife sanctuary (field trip theme varies by location)

Farm to Market
Grades 1–3  | fall, winter, or spring
Single program or series  | One school visit (30 minutes, 45 minutes, or 1 hour) and/or one field trip (2 hours)

Choose either a single school-based program or field trip, or combine the two into a series.

We’ll bring hands-on seasonal farm activities for your group to explore in class, such as planting seeds or carding sheared sheep’s wool. On a field trip to Drumlin Farm, learn about growing crops and raising livestock, helping directly with fun farm chores. Chores may include planting, weeding, harvesting, or caring for farm animals. Schedule multiple visits to experience the farm in different seasons.

Locations: Your school and/or Drumlin Farm Wildlife Sanctuary

Changing Landscapes
Grades 2–4  | fall, winter, or spring
Single program or series  | One school visit (30 minutes, 45 minutes, or 1 hour) and/or one field trip (2 hours)

Choose either a single school-based program or field trip, or combine the two into a series.

Explore evidence of the short-term and long-term changes in the landscape around your school by examining signs of erosion and weathering, and glacial features if present.

On a field trip to a wildlife sanctuary, explore evidence of the short-term and long-term changes in the landscape by examining signs of erosion and weathering, glacial features, and soil composition.

Locations: Your school and/or any Metro West wildlife sanctuary

Wetland Communities
Grades 3–5  | fall or spring
Single program or series  | One school visit (30 minutes, 45 minutes, or 1 hour) and/or one field trip (2 hours)

Choose either a single school-based program or field trip, or combine the two into a series.

Use scientific tools to investigate samples of aquatic life in a classroom wet-lab. Add a live wildlife visit to complete your exploration of wetland energy flow or adaptations. In the schoolyard or your community, use dip-nets and other tools as you explore the unique life cycles of the organisms that live in a water body in your community.

Field Trip: Use dip-nets and other scientific tools to explore wetland animals and their unique adaptations for living in water. Learn to identify specific organisms and understand the special characteristics of different water bodies and ecosystems.

Locations: Your school and/or any Metro West wildlife sanctuary
Adaptations of Plants & Animals
Grades 3–5 | fall, winter, or spring
Single program or series | One school visit (30 minutes, 45 minutes, or 1 hour) and/or one field trip (2 hours)

Choose either a single school-based program or field trip, or combine the two into a series.

Explore your local environment to discover the amazing ways plants and animals use their unique adaptations to thrive—from behaviors to deal with changing seasons to structures for dispersing seeds—and more.

On a field trip to a wildlife sanctuary, explore a combination of field, forest, or wetland habitats to discover the amazing ways plants and animals use their unique adaptations to thrive, such as behaviors to deal with changing seasons, structures to disperse seeds, or body parts to hunt underwater.

This program can focus on animals, plants, or both. Consider adding additional visits to compare different seasons.

Locations: Your school and/or any Metro West wildlife sanctuary

Habitats & Adaptations
Grades 3–5 | fall, winter, or spring
Single Program | 30 minutes, 45 minutes, or 1 hour

Meet live wildlife as you compare their physical and behavioral adaptations and how these relate to their roles within an ecosystem. Learn where they live and how climate change may be affecting them. This program can focus on an animal group, habitat, energy flow, or seasonal adaptations.

Locations: Your school

Science of Food & Farming
Grades 4–5 | fall, winter, or spring
Single Field Trip | 2, 3, or 4 hours

Working directly in fields and barns, explore the challenges of growing food and how it connects with climate change. Depending on the season, participate in farm chores such as planting, weeding, harvesting, mucking, or feeding animals.

Locations: Drumlin Farm Wildlife Sanctuary

Soil Science
Grades 4–5 | fall, winter, or spring
Single program or series | One school visit (30 minutes, 45 minutes, or 1 hour) and/or one field trip (2 hours)

Choose either a single school-based program or field trip, or combine the two into a series.

Dig into a classroom soil-lab with samples brought by our staff, analyzing the composition and properties to understand soil’s function in local ecosystems and determine its health. Learn how healthy soil can support a resilient climate.

On a trip to a wildlife sanctuary, compare soil from field, forest, and wetland habitats, analyzing the composition and properties to understand its function in local ecosystems and determine its health. Learn how healthy soil can support resilient climate, and (at Drumlin Farm only) how it supports healthy food too.

Locations: Your school and/or any Metro West wildlife sanctuary (field trip theme varies by location)
Science of Massachusetts

Science of Massachusetts (SOM) is a multi-week curriculum for grades K–8 that will engage your students in exciting, hands-on, nature-based science right in their own schoolyard. This is a wonderful way to help your students get outside for a healthy dose of nature, even when field trips are not possible.

Curriculum Overview

Tightly aligned to the Massachusetts Science Curriculum Frameworks, SOM takes K–8 students on a deep dive into science concepts through inquiry-based, outdoor learning. Students will complete field journaling assignments and investigations that help them develop important science practices and be invited to find their place in nature and impact their world, whether they live in an urban, suburban, or rural community.

This program is offered in a unique format. Each unit is designed as a series, with one lesson completed over the course of a week. Each lesson includes:

- An engaging, short video that introduces the lesson topic and can be viewed in the classroom or as homework.
- An outdoor field journaling assignment led by the classroom teacher, inviting students to connect with nature through place-based, hands-on science learning,
- A Mass Audubon-led sensemaking session, which allows time for students to deepen their understanding of science concepts and engage in science practices together.

Support is available for districts with financial challenges, and our curriculum is designed to be accessible to all learners. Training is available to support teachers implementing the curriculum for the first time.
Available Units

Grades K–2

**Soil Science: Where the Minibeasts Are**
5-week series

In this unit, we will explore different types of "minibeasts" or invertebrates, like worms, pill bugs, and millipedes. Students will engage in outdoor investigations to find out where the best place is for a minibeast to live, then document their observations in field journals and use evidence to explain how different schoolyard habitats may or may not support the needs of invertebrates. Finally, students will expand their investigation to understand how humans can learn from minibeasts to protect their local environment.

**Rooted in Science: Trees!**
7-week series

Trees provide much more than shade or pretty additions to city streets and neighborhood parks. This unit explores habitats, adaptations, and life cycles, with trees as a unifying theme. With accessibility to all learners as a priority, lessons highlight the diversity of trees across various Massachusetts habitats, including suburban, urban, and rural areas.

Grades 3–5

**Energy on Earth**
7-week series

Learn how energy from the sun powers life on Earth, both living processes and the technologies we use to power our communities. Each lesson explores one aspect of the energy cycle within biotic and abiotic systems, including photosynthesis, consumers, decomposers, and renewable and non-renewable energies.

**Stronger Storms: Taking Action for Community Resilience**
6-week series

In this unit, students will get outside and investigate the ways stronger storms impact their communities, specifically through rain and snow. They will identify places of vulnerability and places of resilience in their schoolyard or neighborhood. As a culminating project, they will design solutions to help reduce the impacts of stronger storms in their area and communicate it with members of their community.

Grades 6–8: Climate of Massachusetts

**Rooted in Solutions: Trees & Climate Change**
7-week series

Are trees the solution to climate change? Through place-based, inquiry-driven investigation, students will study the role of trees in the carbon cycle. Then, they’ll expand their investigation to find out whether forest sequestration (or any single nature-based climate solution) is enough to fight climate change. Finally, students will explore their own role as a changemaker by planning a collective, climate-positive action.

Learn more about Science of Massachusetts at massaudubon.org/som.
Middle & High School

Our Middle and High School programs make science content relevant and exciting through hands-on, place-based lessons that will support your life and earth science curricula. We offer standards-aligned programs that are based at your school, at our wildlife sanctuaries, or a combination of both.

Mass Audubon’s Signature Program

Rivers to Sea

Rivers to Sea is a year-long program in which students and teachers (grades 5–12) partner with Mass Audubon educators to explore, research, and take action in their local watershed.

Through this program, students will learn to recognize the importance and interconnectedness of watershed systems, from rivers to sea. They will also delve into the impact of human activities on watersheds, both positive and negative. At the heart of this STEM-focused program is student involvement in community action projects that will contribute to the improvement of watershed and public health, building their sense of self-efficacy and agency to effect positive change in their local communities.

School educators who participate in Rivers to Sea with their students will work with Mass Audubon educators over the course of a year or more to strengthen their skills and confidence in integrating watershed topics into their curriculum, both in the outdoors and in their classrooms.

Together, we will support student-involved community action projects and help school educators build a support network with their local watershed organizations and other community stakeholders.
Ecosystem Dynamics
Grades 6–8 | fall or spring
Single Field Trip | 2, 3, or 4 hours
Explore patterns of change for the different communities in the temperate biome: fields, forest, and wetlands. Identify how organisms relate with one another (predation, mutualism, competition, dependency, and parasitism) and revisit how organisms are adapted to their environment and how energy moves through trophic levels.

Locations: Broadmoor Wildlife Sanctuary or Habitat Education Center

Ecological Issues & Our Changing Climate
Grades 6–8 | fall or spring
Single Field Trip | 2, 3, or 4 hours
Learn how our local ecosystems are changing over time and how the ways humans live are impacting our climate. What is the balance between Earth’s limited resources and our basic needs? Explore how wildlife sanctuary staff manages the land and positive, climate-friendly changes that can be made in our communities.

Locations: Any Metro West wildlife sanctuary

Freshwater Ecology
Grades 6–8 | fall or spring
Single program or series | One school visit (30 minutes, 45 minutes, or 1 hour) and/or one field trip (2 hours)
Choose either a single school-based program or field trip, or combine the two into a series.
In the classroom, explore samples from freshwater ecosystems hands-on and under microscopes, focusing on your choice of biotic and abiotic factors, evolution and adaptation, biotic health indicators, organism identification, or vulnerabilities to climate change. Take a field trip to a wildlife sanctuary where you'll observe animal and plant life that live in freshwater ponds, streams, marshes, rivers, or vernal pools.

Locations: Your school and/or any Metro West wildlife sanctuary

Farm Ecology
Grades 6–12 | fall, winter, or spring
Single Field Trip | 2, 3, or 4 hours
Delve into the ecology of a working farm, exploring its energy, life cycles, and ecological issues. What does it take to manage healthy soil and protect habitats for a resilient climate, or raise animals and crops for market? Participate in seasonal farm chores such as feeding, mucking, planting, harvesting, and weeding.

Location: Drumlin Farm Wildlife Sanctuary

Climate Ambassadors
Grades 6–12 | fall, winter, or spring
Single Program | 45 minutes or 1 hour
Meet live wildlife ambassadors and explore how humans are impacting native species and the habitats on which they depend. Explore what we can do at home and in our communities to protect local ecosystems and support biodiversity for climate resiliency.

Location: Your school

River Schools
Grades 5–8 | fall through spring
8-program Series
Through hands-on learning in the classroom and in the field, students connect with and build an understanding of watersheds as complex ecosystems, learn about climate change and how it impacts a watershed, and develop and implement action plans to mitigate a climate-related problem they identify. Over a 3-year cycle, teachers participate in professional development, learn to facilitate programs on their own, and eventually serve as mentors for new teachers.

Locations: Your school and various local watershed destinations
Additional Programs

Afterschool Programs

Enrich your afterschool program with a nature-based option that will get students outdoors to explore, have fun, and practice age-appropriate science skills in their own schoolyard. Whether you have access to asphalt and a few trees, a school garden, or a full forest, we will help your students connect with the diversity and wonder of the natural world.

**Environmental Explorers**
Available for grades K–8

Designed for groups of 12–15 students, Environmental Explorers is a weekly afterschool offering that connects students in grades K–8 to nature wherever they are.

Each week, students dig into a new topic while building science practices and naturalist skills. When possible, lessons will bring students outside and use whatever environment is readily available.

**Environmental Leaders Club**
Available for grades 6–12

This year-long, project-based afterschool program engages youth in learning about environmental issues affecting their own community and developing solutions that will make an impact.

Students will participate in hands-on, nature-based learning; practice communication, leadership, and teamwork skills; meet adults in environmental careers; and give back to their community.

Naturalist-in-Residence

Available for all grade levels (Pre-K–12)

Get students outdoors and exploring the natural world right outside of their school doors. Every visit with your Mass Audubon Naturalist-in-Residence will engage students in a hands-on, inquiry-based science lesson.

Our staff will work alongside school teachers to integrate these lessons into the science, literacy, ELL, arts, or other curriculum for any grade level. Frequency of visits can vary from weekly to monthly.

iPlan: Mapping the Future

iPlan is a free online game that allows learners to construct, investigate, and solve simulated urban and regional planning problems. Using real geospatial, ecological, and economic data, iPlan transforms any location in the contiguous United States into an interactive land-use planning simulation.

Middle and high school students can design and test rezoning plans that address socioeconomic and environmental challenges and their plans are evaluated by virtual stakeholders who advocate for different community priorities.

Learn more and start playing at [i-plan.us](http://i-plan.us).
Pricing & Affordability

Mass Audubon is committed to providing inclusive and equitable access to nature. Our school programs are designed to be accessible to as many schools, educators, and children as possible. If cost is a barrier for your students or school, please contact us—financial aid is available for schools with a high percentage of low-income students and we offer discounts for multiple visits.

Field Experience Pricing

Field trip programs that take place at Mass Audubon wildlife sanctuaries are priced at an hourly flat rate for groups of 15 or fewer students. Larger groups will be broken into smaller groups of no more than 15 per Mass Audubon educator. Small group sizes enable us to provide each student with a high-quality experience and individualized attention.

Mass Audubon’s Professional Development programs are designed to increase content knowledge, provide teachers with hands-on, STEM-focused learning experiences, and offer resources for teaching engaging, inquiry-based science lessons in the schoolyard or classroom. In-person and virtual workshops are available, along with consulting and site visits. For an immersive experience, try one of our professional development Summer Institutes!

Program details, dates and times, registration information, and additional offerings can be found on our website at massaudubon.org/pd.

### Summer Institutes

**Nature School for Teachers: Schoolyard Habitats**

*Four in-person, day-long sessions, plus one online follow-up session in November*

Nature School for Teachers is an opportunity for K-8 teachers to immerse themselves in science by exploring their local habitat and meaningfully connecting with the science practices embedded in the Massachusetts Science Frameworks.

Participants will practice inquiry-based learning methods through hands-on exploration of local habitats, field research, and an investigation design process they can bring back to their classrooms.

Locations: Either Drumlin Farm Wildlife Sanctuary, Lincoln or Moose Hill Wildlife Sanctuary, Sharon

### Virtual Workshops

**Teaching Climate Justice**

*Three online sessions, two hours each*

Join educators from across the state and gain the skills, tools, and resources to teach climate change.

In this three-part, virtual workshop series, participants will review the basics of climate change science, learn about local climate impacts through a climate justice lens, and explore how to support students’ involvement in meaningful solutions to climate change in their communities.

Location: Online
School & District Workshops

Early Education (Preschool–Grade 2)

Inside & Outside with Nature
With packed schedules and variable access to time outdoors and natural resources, how do you make environmental learning more of a presence in your classroom? In this three-part series, we’ll explore where nature can fit into your daily routines (hint: everywhere!) and how to incorporate it seamlessly.

Whether you are an urban, rural, or suburban-based school, the workshops in this series will demonstrate ways to bring nature into learning every day.

Register for the full, three-part series and receive a 25% discount on a site visit at your school, or register for a single workshop. Detailed workshop descriptions are available on our website.

Grades K-8

Bringing Learning Outdoors
Make the most of whatever nature surrounds your schoolyard, whether that’s a parking lot, a suburban lawn or a forest. In this three-part series, we’ll help participants use inquiry-based techniques to incorporate the nature around them into their curriculum, while imparting practical skills to make outdoor learning a realistic, enjoyable, and effective part of the school experience.

Register for the full, three-part series and receive a 15% discount, or register for a single workshop.

Consulting
Mass Audubon will support you in designing nature-based activities that fit into your existing curriculum. Consulting can be done in-person or virtually. Contact us to learn more about how we can support you with individualized curriculum support or custom professional development.

Site Visits
Our teacher naturalists will help you make the most of your outdoor schoolyard for learning, whether it’s in an urban, suburban or rural setting. After the visit we will produce a report with suggestions and ideas for topics and activities that will work well in your space. Each visit includes a complete write-up with notes.
Mass Audubon is the largest nature-based conservation organization in New England. Founded in 1896 by two women who fought for the protection of birds, Mass Audubon carries on their legacy by focusing on the greatest challenges facing the environment today: the loss of biodiversity, inequitable access to nature, and climate change.

Find Your Sanctuary
Find a place to explore at: massaudubon.org

Mass Audubon
Mass Audubon is the largest nature-based conservation organization in New England. Founded in 1896 by two women who fought for the protection of birds, Mass Audubon carries on their legacy by focusing on the greatest challenges facing the environment today: the loss of biodiversity, inequitable access to nature, and climate change. With the help of our 160,000 members and supporters, we protect wildlife, conserve and restore resilient land, advocate for impactful environmental policies, offer nationally recognized education programs for adults and children, and provide endless opportunities to experience the outdoors at our wildlife sanctuaries. Explore, find inspiration, and take action at massaudubon.org.
